## Epi-fluorescence Attachment for AE30 / 31 Inverted Microscopes

The system is exceptional at handling difficult fluorescence tasks,  
rendering images with outstanding clarity and exceptional contrast

AE31+Epi-fluorescence Attachment

# Combining the Motic AE30/31 CCIS optics with the unique design of epi-fluorescence attachment, a fluorescence image of excellent brightness and sharpness over an extended field of view of FN22 is achieved.

The Motic Epi-Fluorescence microscope is rapidly becoming an invaluable tool of investigation. Its advantages are upon features not readily available in other optical microscopes.
